

Local Offer - East Grinstead Group of Schools (EGGS)

Update 27th November 2013

In response to a request from the EGGS Headteachers' Group and in the light of forthcoming national legislation, EGGS SENCOs have taken a proactive approach to the development of future Special Educational Needs and Disability (SEND) provision for the 0 – 25 age group by considering the feasibility of a local SEND Hub Network based in East Grinstead.

Representatives of parents, governors and SENCOs have met together to share an introduction to the concept of a SEND Hub Network.

The group felt that strategically the creation of a local hub would better serve the families, children and young people in the area and this will be the basis of the Local Offer.

A working party will take this project forward over the coming month, reporting to Headteachers, Governors and SENCOs initially and with a view to reporting to and consulting more widely with a broader stakeholder group including families, providers and associated services, including health and social care, early in 2014.
