

At Sackville we aim to ensure all Sackville students receive effective careers guidance to allow them to make informed choices about their future. CEAIG is embedded into lessons and we have good links with companies who support us with the events and our students who need help seeking experience. The destination data shows some of our success in ensuring that students are employed or enrolled on a course when they leave Sackville. The table to the right exhibits some of the whole school activities that take place throughout the year.
