September 2013

Dear Parent/Carer

As your child embarks on their GCSE triple science course, we are eager to provide every opportunity for them to succeed. Much of this success will rely on their ability to revise work covered in preparation for internal and external exams, which are completed throughout years 10 and year 11.

In response to feedback from parents and students, we continue to offer the opportunity to buy copies of the revision guides and workbooks to support students. Students will receive a brand new book tailored to their course in which they can write additional notes or information. The workbooks provide hundreds of questions with answers to enable students to assess their own progress and practise questions. Online editions come free with each revision guide for use on mobile devices too.

Each of biology, chemistry and physics requires a revision guide and workbook. We are offering books at the cost price for the school, which is £2.75 per book, and £3 for answers. Therefore, to receive a set of six new books plus answers **will cost £19.50**.

If you would like to take advantage of this opportunity, please return the reply slip with payment. Alternatively, complete payment online through the school website. Please be reassured that students who do not wish to buy their own copies will still have access to identical books in school during the revision period.

Yours sincerely

Mr S Bush  
**Curriculum Leader of Science**
